## **Check or Checkmate:**

Airplane-Wildlife Collisions 2001-2015

Out of over 28,000 wildlife strikes on airplanes recorded between 2001-2015, 94.7 ended up costing airlines and airports \$0 in aircraft repairs. Nevertheless, the remaining **5.3% of collisions account more than \$100 billion of damage** in addition to the huge amount of animal deaths by collisions. This dashboard allows to explore and see which airports had the highest number of collisions by species, highest wildlife strike-related costs, and the most human passengers during this pe

Total cost by airport
